Yes- I am just making sure I didn't get snarky in any of the comments. Looking thru it now.

Sure. I will check to see if I put any "for our eyes only" comments in.

Can you send this directly to Juan? I have been swamped with meetings all day.

Apple- I do not think our concern about “new” units has been adequately addressed in this revision- counter to what Bill W. said on the phone. I have made a few edits and suggested a footnote to make it clearer.

In response to your request below, attached are the comments that OGC sent to OAQPS on the “project netting” memo on Tuesday. The content highlighted in yellow are additions I made after a prior version we sent to OAQPS on Monday. In addition, yesterday, I sent OAR the recommended footnote text below to address the procedural interplay of this memo and the 2006 rule proposal. Sorry I did not see your request before the call at 2 today.

Brian

I had a long conversation with Raj yesterday. He told me that the Project Netting memo has been revised since we last saw it and that some of OGC's comments were accepted. Can you share with us what you sent to OAQPS. Terri can share her comments with you as well. We were asked not to send forward line edits (so we did not) but we did put together line edits for our own internal purposes (just to have a record of the changes we thought were necessary).

Thanks.
